

CELLS

by Vera

★ Prokaryotic cell

A very simple single celled organism like bacteria.

They don't have a nucleus.

Their DNA floats in the cytoplasm.

They are smaller and simpler than Eukaryotic cells.

Bacteria

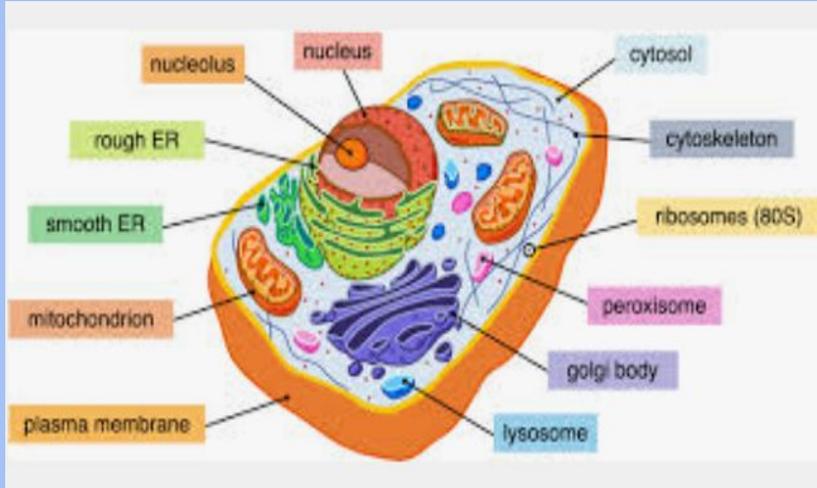

Archaea

Eukaryotic cell

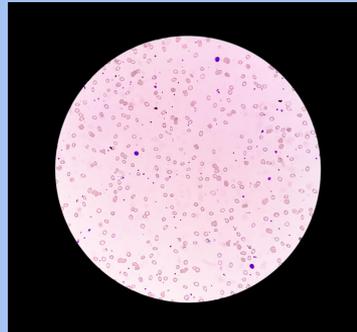

A complex cell that has a control centre called the nucleus which holds all genetic material.

They have a nucleus.

The DNA is found in the nucleus.

They are bigger and more complex than prokaryotic.

Animal cells

Plant cells
